Firmware Information

The present document provides download links and detailed release notes for each firmware version of the Portenta X8; explaining the changes, improvements, and fixes for each released firmware.

Hardware and Software Requirements

Supported Device:

Portenta X8

Compatible carriers with the supported device:

- Portenta Breakout board**
- Portenta Max Carrier**
- Portenta Hat Carrier**

Firmware Versions

The following section highlights the critical updates and enhancements introduced in the latest firmware version. It presents the most significant progress and optimizations implemented to improve performance, enhance user experience, and strengthen security.

Latest Firmware

Version:

2025.08.12

**(Release arduino-
91.9, OS Image
934)**

The listing herein offers a glimpse into the Portenta X8 firmware's continuous improvement and enhancement. You can expect a concise overview of the integrated key new features, major bug fixes, and critical security patches to ensure the highest level of functionality and performance within the Portenta X8 system.

Image Access:

You can download the latest firmware version [here](#). If you need

 instructions on updating the Portenta X8, you can follow [this guide](#) using the **uuu** tool.

Bug Fixes:

[H7] Updated H7 firmware: prevent buffer overflow during rx phase

For more information on the Foundries Core related to our release, please refer

 to the [LmP V91 Release Notes — FoundriesFactory 91 documentation](#).

Available Firmware Versions

Below is a list of all available firmware versions with their release notes.

OS Image 910

► [2025.01.17 \(Release arduino-91.8, OS Image 910\)](#)

OS Image 881

► [2024.09.16 \(Release arduino-91.4, OS Image 881\)](#)

OS Image 861

► [2024.06.26 \(Release arduino-](#)

OS Image 846

- 2024.05.15 (Release arduino-91.1, OS Image 846)

OS Image 844

- 2024.05.10 (Release arduino-91, OS Image 844)

OS Image 822

- 2024.04.08 (Release arduino-88.94, OS Image 822)

OS Image 746

- 2023.10.25 (Release arduino-88.91, OS Image 746)

OS Image 719

- 2023.09.27 (Release arduino-88.7, OS Image 719)

For instructions on how to install or upgrade to the latest firmware version, you can use the [Arduino Linux Wizard for the Portenta X8](#) or [flash it manually](#) downloading the newest version directly from this [link](#).

Older Firmware Versions

Older versions than version **OS Image 719 - September 27, 2023** are deprecated. An update to the latest version is recommended.
